

**Buggs Island Telephone Cooperative**  
**BIT Communications**

To Whom It May Concern,

One of your tenants has signed up for BIT's high-speed 4G LTE broadband service. Since the person applying for service does not own the residence in which the BIT customer premise equipment is to be installed, we ask that you, the landlord, give approval prior to any installation to ensure a smooth installation experience.

Installation of the BIT equipment may involve modifications to the residence. While these modifications are often minor, standard professional installation many times includes the drilling of holes in order to run cable and attaching an antenna mount securely to the outside of the structure. Any such type of modification may be forbidden pursuant to the terms of your lease/rental agreement with the tenant requiring pre-approval by you, the landlord.

If you, the landlord approve, please sign the bottom of this form to acknowledge authorization for the installation and provide this signed form to a BIT representative prior to the time of installation.

By providing this signed form to BIT, you are granting BIT permission to install the BIT equipment and are releasing BIT from obligation to remove your system after it is installed. The signed installation permission form releases BIT (including any installation technician) from any liability related to damages your landlord may claim as a result of an alleged violation of your lease/rental agreement as it relates to the installation of the BIT equipment.

If you, the landlord, only approve the BIT equipment installation subject to special requirements that makes the actual install more expensive (or exceeds what BIT offers within its standard professional installation), you will advise the tenant to pay a corresponding charge, to be agreed upon by you, the tenant and BIT's installer, for the additional services.

**Comments or specific stipulations on the installation by you, the landlord. Please Print:**
